REPORT ON TRAINING PROGRAM IN CLINICAL SKILL LAB

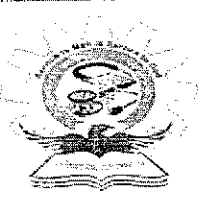

Today, skill laboratories or "skill programs , i.e. specific practical skill training facilities are a firmly established part of medical education offering the possibility or training clinical procedure in a safe and fault-forging environment. Skill lab training follow a structured teaching concept, takes place under supervision, ideally creating an atmosphere that allows the repeated, anxiety-and risk free practice skills.

College has well equipped labs namely Nursing Foundation lab, Anatomy lab, Maternal and Child Health, Nutrition Lab, community lab. All labs are equipped and are used for providing demo, re-demo OSCE/OSPE, Practical examination. The advanced training is provided through programs conducted by medical representatives What's new Learning, add on courses.

As per our policy theory lectures are conducted followed by demonstration, Re-demonstration are conducted to provide student with Practice. In addition, student are posted in MICU, SICU, NICU to give them enhanced experience of advanced equipment's.

These programs are supported by providing video assisted learning. Beginning of the year theory lecture are covered and usually a time table planned to provide students with practice of procedures. Assignments are spaced so that student are able to co -relate theory with practice. Student's supervised by teacher and then independently practice procedure. Details are recorded in procedure books. Student need to fulfill criteria of 85 % work in clinical so that the student is eligible for examination.
