### **2.3.3 Teachers use ICT-enabled tools for effective teaching and learning process, including online eresources.**

Information communication and technologies are utilized for effective teaching and learning. The social importance information and communication and technologies (ICT) require updated teaching practices to support nursing knowledge and advancements. These technologies include technical means to share information and communicative processes through resources such as computers, internet, and social media.

In classrooms ICTs have a significant influence on learning process. It can increase the autonomy of the process of seeking knowledge, assist the apprehension of the content supports clinical decision making and improves the quality of nursing profession. ICT will be an indispensable component in nursing curriculum

**USES OF ICT:** The use of ICT in the class room teaching learning provides opportunities for teachers and students to operate, store and retrieve information, and encourage students for independent and active learning and become responsible for teaching and learning. It also enables the teachers to plan and prepare the lessons and design materials such as course content, sharing of resources, their expertise and advice. The following Steps are taken to implementation ICT in the college; The classrooms are equipped with boards, podiums, LCD projector, overhead projector facilities to support the teaching learning process. The teaching faculty has ICT knowledge and can integrate with teaching learning activity; they also encourage their students to use ICT for learning. Our campus is having Wi-Fi facilities which can be utilized by the faculty and students for updating with recent expertise.

The college has National Digital Library India, Shodh Sindhu, Shodh Ganga, PDF Drive and DELNET, and computer lab with internet facilities which provides remote access to e- resources.

The students and faculty use different ICTs like printed materials, laptops for presentations and demonstrations.

Management information system (MIS) of the college provides capabilities for building student schedules, tracking student's performance, preparing the transcripts and managing many other student related data in the college.

Teachers also use ICT tools in simulation-based learning to create real patient scenario/environment. This will enhance the learner's motivation and engagement by facilitating the asset of basic skills. During Covid-19, WhatsApp, Zoom meetings, Google Meet teams are been used by teachers and succeeded with effective teaching. After covid-19, face to face teaching and online teaching are followed to enhance the teaching learning skills of the students and teachers respectively.
